Reliable vehicle assessment

for car dealers and
leasing companies

**A complete vehicle
scan in a maximum of
5 minutes**

**A digital checklist for
documenting the condition
of the vehicle**

**More transparency
for customers**

SINDRI looks deep into the vehicle and provides a more reliable basis for validating vehicles. This digital service tool from Continental provides information on upcoming service and inspection appointments and also looks for hidden defects and evidence of mileage manipulation.

Smart, fast, secure

SINDRI checks the inner values

Gone are the days when visible marks alone, like damage to paintwork or scratches on alloy rims often determined the condition of a leasing return or the residual value of a used vehicle. SINDRI looks deep into the vehicle and provides a more reliable basis for assessing vehicles.

SINDRI offers you fast **access to the onboard diagnostic data** of vehicles and helps you to quickly and reliably determine the condition of leasing returns and used vehicles. The diagnostic data is read out and transmitted via the OBD interface of the vehicle through the **Data Acquisition Device** (Vehicle Communication Interface, VCI).

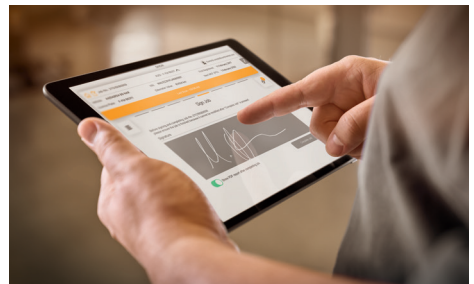

Get information about upcoming service and inspection dates, detected DTCs (Diagnostic Trouble Codes) and display evidence of **mileage and DTC tampering**. SINDRI acquires and records the relevant ECU data quickly and easily.

SINDRI gives car dealers, multi-brand dealerships and valuation specialists the certainty that they're getting a realistic vehicle value and condition **based on 100% reliable data**. Thanks to SINDRI's data analysis, it's easier to determine the value of a vehicle for sale and to reveal hidden costs due to upcoming service appointments or needed repairs.

Continental's **many years of experience** in original equipment and in the aftermarket have paid off in the selection of these data points.

SINDRI covers more than **80% of the European car park** and scans the vehicle completely in less than five minutes.

Thanks to Continental's **experience** gained from cooperating with more than 30 manufacturers, the software can be used with a **great number of brands**.
